

GoEngineer Purchases FATHOM’s 3D Printing Equipment Reseller Business—FATHOM Focuses Exclusively On Its Fast-Growing Digital Manufacturing Services

Similar values and shared mission for changing how products are designed, prototyped, and manufactured underlie strategic agreement

Salt Lake City, UT, September 11, 2018: GoEngineer, a leading reseller of SOLIDWORKS 3D CAD software and Stratasys 3D printers has announced they are partnering in a strategic agreement with FATHOM, an advanced manufacturer of prototypes and production parts with an expertise in 3D printing and additive manufacturing.

The agreement allows both FATHOM and GoEngineer to scale in significant ways: GoEngineer will manage ongoing machine sales, and FATHOM will fully focus on providing industry-leading prototyping and manufacturing services to better serve each other’s customers. “We are taking the next step to help our customers on their journey into digital manufacturing,” said Ken Coburn, founder and president of GoEngineer.

The two companies will leverage their complementary strengths to create the largest product development ecosystem of industry-leading software, hardware, manufacturing, engineering, design, and training solutions that help companies drive greater innovation.

“It’s exciting for our industry because both FATHOM and GoEngineer are uniquely positioned to meet the ever-increasing demand for advanced tools and services that enhance and accelerate a company’s product development and production processes,” said Michelle Mihevc, co-founder and principal at FATHOM.

“FATHOM is doing amazing work,” said Brad Hansen, CEO at GoEngineer. “Together, we will provide best-in-class, unmatched digital manufacturing solutions to our customers.”

About GoEngineer

GoEngineer delivers software, technology, and expertise that enable companies to unlock innovation and deliver better products faster. With more than 30 years of experience and thousands of customers in high tech, medical, machine design, energy, and other industries, GoEngineer provides best-in-class design solutions from SOLIDWORKS, Stratasys, CAMWorks, Creaform, and Oracle’s Agile PLM. For more information, visit www.goengineer.com.

About FATHOM

FATHOM is an advanced technology-driven manufacturer of prototypes and production parts with a unique advantage of agility. Services include but are not limited to 3D printing, additive manufacturing, CNC machining, urethane casting, tooling, and injection molding, as well as contract engineering support and on-site managed equipment services. FATHOM is uniquely blending additive technologies with traditional manufacturing methods, so companies can go from prototypes to production parts in ways, and at speeds, not previously possible. Every day, industry-leading companies leverage FATHOM’s expertise to put satellites into orbit, electric cars on freeways, and a full spectrum of devices into people’s hands and homes.
