

## **GoEngineer Continues Global Leadership in 3D Design Software and 3D Printing**

*Earns Top Awards Worldwide from SOLIDWORKS and Stratasys*

**Salt Lake City, UT, February 27, 2017:** GoEngineer, a leading reseller of [SOLIDWORKS](#) 3D CAD software, [Stratasys](#) 3D printers, [Creaform 3D scanners](#), [CAMWorks](#), and Oracle's Agile PLM, today announced its continued leadership position in providing and supporting powerful product-design, engineering and manufacturing tools that help make the design process innovative, efficient and intelligent.

"Our continued investment into expertise in areas that complement our core business of 3D CAD design and 3D printing enables us to be the partner of choice for companies – both large and small – that are looking to leverage the next wave of product design and manufacturing technologies," says Ken Coburn, GoEngineer president and founder. "Our mission to help customers reduce the cost, risk and time to achieve GoLive® status with new technologies is resonating in the marketplace and helping our customers to quickly and effectively improve their capabilities."

The GoEngineer SOLIDWORKS 2017 product launch events achieved a milestone of their own by attracting more customers and prospects than any other reseller in the world. "This validates that we are doing the right things for our customers day in and day out," says GoEngineer CEO Brad Hansen. "In our crazy-busy culture, business leaders can only afford to attend high value events, so this is a huge confirmation that we are truly providing expert guidance and support. It is one thing to continue company growth and quite another to maintain exceptional customer service in the process (customer satisfaction surveys returned a strong 97+ percent in 2016). We also added additional resources to our technical teams in the growing areas of plastics, electrical, PCB design, additive manufacturing and scanning."

GoEngineer continued its global leadership by receiving No. 1 for North American and worldwide awards from SOLIDWORKS in the following categories: SOLIDWORKS, simulation, education, multi-product and individual achievements. GoEngineer also achieved No. 1 in worldwide sales and growth of Stratasys 3D printer technologies. The acquisition of Engatech in late 2016 adds even more strength to the company's 3D printing expertise and leadership.

GoEngineer maintains its reach across the student and entrepreneurial community as an award-winning national educational reseller for SOLIDWORKS in 2016. By providing over 45,000 SOLIDWORKS licenses to universities, high schools, STEM programs, maker spaces and incubators, GoEngineer is on the forefront of enabling students, entrepreneurs and inventors to start businesses and shape their world in tangible ways.

### **About GoEngineer**

GoEngineer delivers software, technology, and expertise that enable companies to unlock innovation and deliver better products faster. With more than 30 years of experience and thousands of customers in high-tech, medical, machine design, energy, and other industries, GoEngineer provides best-in-class design solutions from SOLIDWORKS, Stratasys, CAMWorks, Creaform, and Oracle's Agile PLM.

GoLive is a registered service mark for GoEngineer. For more information, visit [www.goengineer.com](http://www.goengineer.com).

## **About SOLIDWORKS**

Dassault Systèmes, the 3DEXPERIENCE Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 210,000 customers of all sizes, in all industries, in more than 140 countries.

## **About Stratasys**

For more than 25 years, Stratasys Ltd. (NASDAQ:SSYS) has been a defining force and dominant player in 3D printing and additive manufacturing - shaping the way things are made. Headquartered in Minneapolis, Minnesota and Rehovot, Israel, the company empowers customers across a broad range of vertical markets by enabling new paradigms for design and manufacturing. The company's solutions provide customers with unmatched design freedom and manufacturing flexibility - reducing time-to-market and lowering development costs, while improving designs and communications. Stratasys subsidiaries include MakerBot and Solidscape, and the Stratasys ecosystem includes 3D printers for prototyping and production; a wide range of 3D printing materials; parts on-demand via Stratasys Direct Manufacturing; strategic consulting and professional services; and the Thingiverse and GrabCAD communities with over 2 million 3D printable files for free designs. With more than 2,700 employees and 1,200 granted or pending additive manufacturing patents, Stratasys has received more than 30 technology and leadership awards.
